PLATFORM ASSEMBLY

Attach Latched Hooks

1. Locate right and left latched hooks and offer up to platform rails. Align with round holes and fix in place with two M8 x 25mm bolts, two 8mm Ø Nylon Washers, two 8mm Ø metal washers and two M8 lock nuts as per illustration.

Note: The **nylon** washers must be positioned between the strut and the outside face of the platform rails.

2. Repeat above at other end of platform.
3. Tighten sufficiently to allow the hooks to rotate.

IMPORTANT

Before use check that all assembly operations have been completed correctly. Read operation instructions on product fully and practice setting both ladder and platform modes. Failure to do so may result in an accident.
